Forest Restoration Initiative

Join us in our mission to restore degraded forest areas. This challenge involves planting native trees, monitoring their growth, and promoting biodiversity. Your efforts will contribute to carbon sequestration, habitat restoration, and overall ecosystem health.

Objectives

Plant 100 native trees

Monitor tree growth for 6 months

Promote biodiversity in the area

Potential Impact

Carbon sequestration

Habitat restoration

Ecosystem health improvement

Progress

Trees Planted 60/100

Monitoring Duration 2/6 months
